

Maven Toys — Sales & Inventory Analytics

Professional Business Intelligence Report

Retail sales, product, store, geographic and inventory analysis built in Microsoft Excel.

Scope	Verified project coverage
Analysis period	January 2022 – September 2023
Comparable growth	January–September 2022 vs January–September 2023
Revenue	\$14.44M
Transactions	829,262
Units sold	1,090,565
Products / Stores	35 / 50
Inventory on hand	29,742

Author: Salma Lmaimouni — Second-year Management student

1. Executive Summary

Maven Toys generated **\$14.44M** in revenue from **829,262 transactions** and **1,090,565 units sold** across **35 products** and **50 stores**. The project covers January 2022 through September 2023.

On a like-for-like January–September basis, revenue increased **30.9%** in 2023 versus 2022. Toys is the strongest category at **35.26%** of revenue, while Toys and Games together represent **50.7%** of total revenue.

Decision signal	What the analysis shows
Growth	Revenue +30.9%; units +40.8%; transactions +37.5% on the comparable period.
Category concentration	Toys and Games together represent 50.7% of total revenue.
Store concentration	Top five stores contribute 15.4% of total revenue.
Geographic reach	Ciudad de Mexico is the largest individual city market, while remaining cities represent most sales.
Inventory visibility	29,742 units are recorded on hand; turnover and stock coverage are not yet calculated.

Verified Core KPIs

Revenue	\$14.44M	Transactions	829,262
Units sold	1,090,565	Avg. units / sale	1.315
Products	35	Stores	50
Inventory on hand	29,742	Avg. product price	\$14.76

2. Sales Performance

2023 is a partial year, so year-over-year growth uses the same January–September period for a fair comparison.

Metric	Change
Revenue	+30.9%
Units sold	+40.8%
Transactions	+37.5%

Interpretation: Revenue growth is accompanied by stronger unit volume and transaction activity, indicating broad sales momentum rather than a signal based only on pricing.

Monthly sales trend

The workbook dashboard shows monthly sales for 2022 and 2023. The 2023 series is available through September, which is why the comparable Jan–Sep period is used for the headline growth metric.

3. Product, Store & Category Performance

Product category revenue

Category	Revenue	Share
Toys	\$5.09M	35.26%
Art & Crafts	\$2.71M	18.73%
Electronics	\$2.25M	15.55%
Games	\$2.23M	15.42%
Sports & Outdoors	\$2.17M	15.04%

Toys is the leading category. Toys and Games together account for **50.7%** of total sales.

Top stores by sales

Store	Sales
Store 31	\$554,553
Store 30	\$449,355
Store 9	\$433,556
Store 17	\$411,157
Store 7	\$372,999

The top five stores contribute approximately **15.4%** of total revenue.

4. Geographic & Product Performance

Highest-performing cities

City	Revenue	Share
Ciudad de Mexico	\$1.65M	11.4%
Guadalajara	\$1.32M	9.2%
Monterrey	\$1.26M	8.7%
Hermosillo	\$0.90M	6.3%
Guanajuato	\$0.87M	6.0%
Puebla	\$0.81M	5.6%
Other Cities	\$7.63M	52.8%

Ciudad de Mexico is the strongest individual city, while sales remain broadly distributed across the network.

Top products by sales

Product	Sales
Product 18	\$2.39M
Product 6	\$1.56M
Product 19	\$0.97M
Product 1	\$0.93M
Product 30	\$0.91M

Product 18 is the strongest individual product by revenue.

5. Executive Dashboard

The dashboard below is the actual dashboard from the workbook, presented as a clean image without Excel interface elements. No charts, KPIs, map, labels or layout have been recreated or substituted.

6. Inventory & Analytical Methodology

Inventory

The verified workbook contains **29,742 units of inventory on hand**. This KPI provides stock visibility but does not by itself measure inventory efficiency.

Potential future metrics include inventory turnover, stock coverage, sell-through and product-level replenishment priority.

Analytical workflow

RAW DATA	PREPARATION	ANALYSIS	KPIs	VISUALIZATION	INSIGHTS
Sales, products, stores & inventory	Cleaning & calculated fields	Sales, product, store & inventory	Validated metrics & growth	Dashboard & charts	Findings & recommendations

Workbook analytical areas: Sales Analysis, Product Analysis, Store Sales Analysis, Stores Analysis, Inventory Analysis, Cross Analysis and THE DASHBOARD.

Tools: Microsoft Excel, Excel formulas, Pivot Tables, data visualization and GitHub.

7. Key Insights & Recommendations

Insight	Recommended action
Sales growth is strong	Continue like-for-like year-over-year monitoring as additional periods become available.
Toys and Games are highly important	Prioritize availability, replenishment and assortment attention in these categories.
Top stores contribute materially	Study high-performing stores to identify practices that can be replicated.
Demand varies by city	Use geographic patterns to support store planning and assortment decisions.
Inventory is visible but efficiency is not yet measured	Add turnover and stock-coverage metrics in a future version.

Project Deliverables

- Excel Analytics Workbook — complete data analysis and executive dashboard
- PDF Business Report — analysis, insights and recommendations
- GitHub README — project documentation

Conclusion

This project demonstrates how a large retail transaction dataset can be transformed into a structured business intelligence solution. It combines sales, product, store, geographic and inventory perspectives to support data-driven decision-making.
